Programmer/Analyst

Co-ordinate in managing all phases of web based, n-tier projects for a wide range of clients requiring interactive, database driven web applications. Conduct requirements engineering and develop specifications; plan and implement projects from initial connectional design, develop physical model, coding, final delivery, and client approval.

E-Commerce Web Site for TCS Pvt. Ltd. (www.tcscourier.com)

This is a logically 3 tier corporate web site developed for TCS. It provides customer facility that they can book their parcels through web site. This application is developed on Microsoft technologies like ASP 3, Visual Basic 6, SQL Server 2000 and Erwin 4.

- All business rules and data access logic was encapsulated into non-MTS business components (COM) developed in Visual Basic 6. I was responsible for designing the object model and programming it.
- Besides booking features this web site contains news zone, Knowledge center, Branch Locator, calculators, and all about TCS etc. It also has full online tracking facility.
- My responsibility was to develop a normalized data model. Database was located on a separate server. The local database of TCS updates for new transactions from the web server.

E-Commerce Web Site For Sentiment Express (www.sentiments4u.com)

Sentiment Express gives their user the facility that they can send different things like flowers gifts etc. Sentiment express is a sub division of TCS. Tools used are ASP 3, and SQL server 2000. Case tools used are Erwin 4.

- This site has different categories like watches, flowers, gift packs etc from which user can send these items to their friends or fellows. They can pay for that through credit cards.
- Admin of the site include auto emailing, files uploading, and changing rates of items. We used Asp Email for auto email and Asp Upload for file uploading.
- I was responsible for analysis of both systems, defining specifications, developing normalized data models,

programming the applications, and customer approval.

SKILL SET

- Oracle / Developer.
- .NET (C#, ASP.NET, SQL Server).
